Work Experience

Front-End Developer

WITT Hub Ottawa, Canada (Remote) Jan2024 - Present

Project: Co-parent Web application

- Developed and optimized the front-end of the Co-Parent web application using React.js, effectively utilizing components, hooks, and CSS frameworks.
- Integrated RESTful APIs via Axios, ensuring real-time data synchronization and enhancing the user experience.
- Collaborated closely with UX/UI designers to convert wireframes into responsive, user-friendly interfaces.
- Performed extensive testing and debugging to improve code efficiency and reduce bugs, ensuring a seamless application performance.

Web UX/UI Designer & Developer 2021-2023

Freelance

Projects: ACP Renovation (WordPress, custom theme), Unisolution (WordPress), Time Tracking App (UX/UI), Toy Share (UX/UI)

- Led client consultations and delivered tailored design solutions, significantly boosting client satisfaction.
- Conducted UX research through interviews and surveys, applying insights to designs, which resulted in increased user engagement.
- Designed and implemented site architecture, improving user navigation and overall experience.
- Created interactive, clickable prototypes using Figma to visualize design concepts for stakeholders.
- Executed usability and A/B testing to validate design choices, leading to a 20% increase in user engagement.
- Developed websites using HTML, CSS, JavaScript, and WordPress, ensuring seamless integration of design and functionality.

Translator

Unisage Solution inc., Montreal 2016-2017

Researcher & Teaching Assistant

Azad Tehran University, Iran 2012-2014
