Work Experience

Front-End Developer (2024 - Present)

WITT, Ottawa, Canada (Remote)

- Developing the front-end of the Co-parent web application using JavaScript, React.js, Styled Components, MongoDB, HTML, and CSS.
- Participating in code reviews to offer constructive feedback aimed at enhancing code quality and maintaining coding standards.
- Collaborating closely with the UI/UX team, backend developers, and stakeholders to provide technical expertise and contribute to project planning and estimation.

UX/UI Designer & Developer (Freelance) (2021 - 2024)

- Conducted in depth analysis of client's business needs, defining problems, and delivering data-driven solutions.
- Executed user experience research, including interviews and survey development, to identify and understand potential users.
- Conducted competitor analysis and heuristic evaluations to pinpoint UX issues and provided strategic recommendations.
- Took charge of information architecture and interactive design for a website redesign project.
- Developed clickable prototypes using Figma. Implementing usability testing and A/B testing with potential users.
- Practical experience of using and building design systems, along with HTML, CSS and JavaScript programming skills and extensive knowledge of WordPress.

Teacher (2018 - 2021)

Chanterelle school, Longueuil, Canada (On-site)

- Planned lessons and educational materials to suit the learning needs of students.
- Provided constructive feedback on student work and assignments.
- Managed and communicate with students to identify their needs.
- Collaborated with colleagues to plan and coordinate teaching activities.

Translator (2016 - 2018)

Unisage Solutions Inc, Montreal, Canada (On-site)

- Translated construction software applications from Persian to French and vice versa.
- Utilized computer programs such as Word and Excel for precise translations.
- Coordinated with internal team members to fulfill translation requirements.

Researcher & Teacher Assistant (2013 - 2014)

Azad University, Tehran (On-site)

- Conducted research in a laboratory setting.
- Worked collaboratively with team members.
- Prepared the report and articles summarizing research findings.
- Managed and communicated with 30 students.
