Objective

Front-End Developer with a strong background in web design and development. Experienced in creating responsive and user-friendly websites using **HTML, CSS**, **JavaScript**, **React.js**, **Next.js**, **TypeScript**, **PHP,** and **MySQL**. Possesses strong knowledge of **UX/UI** principles to optimize user experience. Proficient in working with CMS platforms like **WordPress**. Seeking opportunities to leverage my skills in a collaborative environment to contribute to impactful projects and achieve professional growth.

Work Experience

Front-End Developer (Jan 2024 - Present)

Women IT Teleworkers (WITT), Ottawa, Canada (Remote)

Project: Co-parent Web application

- Developed the frontend of the Co-parent web application using React.js, leveraging components, hooks, and CSS frameworks.
- Integrated RESTful APIs with Axios, ensuring real-time data synchronization.
- Collaborated with UI/UX designers to transform mock-ups into functional interfaces.
- Conducted testing and debugging to maintain high code quality.

Web UX/UI Designer & Developer (2021 - 2023)

Freelance

Multi projects: ACP Renovation (WordPress), Unisolution, Time Tracking App (UX/UI project)

- Delivered data-driven design solutions through comprehensive client needs analysis.
- Executed user experience research, including interviews and surveys, to identify and understand potential users.
- Managed information architecture and interactive design for website redesign projects.
- Developed clickable prototypes using Figma and conducted usability and A/B testing.
- Built websites using HTML, CSS, JavaScript, and WordPress.

Educator (2018 – 2021)

Longueuil, Canada (On-site)

- Planned and developed pedagogical materials using educational software to enhance student learning.
- Managed and communicated with students to identify needs and provide feedback.
- Collaborated with colleagues to coordinate pedagogical activities and continuously improve educational content.
